Composing music with AI

melodrive
Hello!

I am Valerio Velardo, PhD
Cofounder & CEO @ Melodrive
valerio@melodrive.com
Music: A history of tools

Ivory flute found at the Hohle Fels cave system, Germany (35K–43K BC)
Music: A history of tools
The AI music revolution?
What will be the impact of AI in music?
What will be the impact of AI in music?

1. Replace composers

2. Enhance the creative process
An interesting analogy...
What will be the impact of AI in music?

1. Replace composers

2. Enhance the creative process
How AI can enhance the music creative process

- Exploring new musical ideas
- Fast music prototyping
- Infinite version of a composer
... I picture myself crafting [musical] ideas and then using the AI to augment variations or even other intensities [...]. I see AI-assisted composition where I can curate what the AI comes out with and tweak that.

Guy Whitmore, Video Game Composer
Melodrive

- AI music engine
- Realtime generation
- Emotionally-variable music

The future of music
The Sound of AI
Where AI, music and video game worlds meet.

Folk the algorithms: traditional music in AI music research
Folk music provides an excellent sandbox for machine learning research, but play with care.
